CAPABILITY STATEMENT

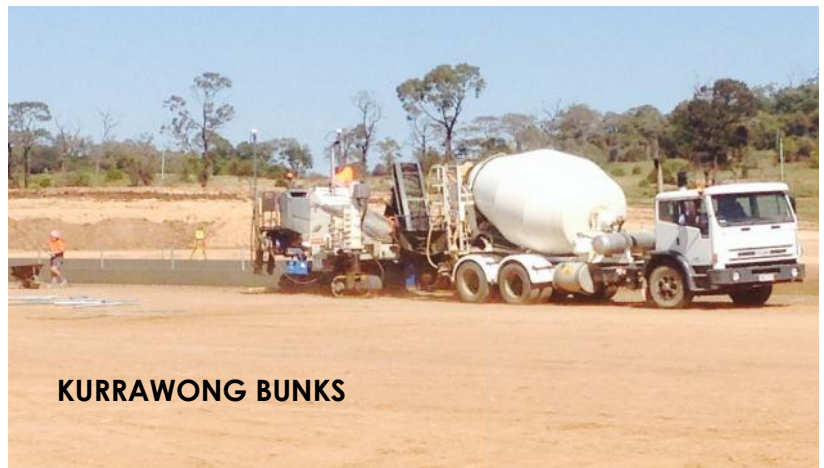

MAIN BUSINESS ACTIVITIES

Wild River was established in 2007 in the Northern Territory where Coleman Builders had moved to pursue remote housing opportunities. Wild River soon expanded to employ up to 40 workers servicing the need for a complete workforce solution as a subcontractor for Leighton Holdings throughout the Northern Territory on Federal Housing programmes. The need for consistent reliable concrete supply saw Coleman Builders form Wild River Concrete to enable self-sufficiency on large scale housing projects constructing up to 60 dwellings at a time. Wild River consistently delivered projects on time with a focus on safety and quality. Since then we have evolved becoming a business that has multiple genuine capabilities with the addition of ready-mix concrete plants & precast concrete casting systems.

PRODUCTS & SERVICES

Our two core businesses are Concrete and Construction. With a large range of plant and equipment the construction division benefits from the support of this equipment to enable Wild River to handle most scopes of works required by a client. These include:-

- J Labour Hire – Work Crews
- J Plant & Machine Hire (Wet or Dry)
- J On Site Concrete Batching
- J Commercial Building
- J Project Management
- J Site Supervision
- J Transport Services
- J Concrete Slabs
- J Slipform concrete
- J Precast concrete cattle troughs & bunk
- J Fencing
- J Auger Rig Drilling Inc. Conductor Holes
- J Structural Steel & Metal Fabrication

Wild River prides itself on being able to assist clients in getting a quality job done safely, on time and within a budget. We also recognise the importance of good relations with clients, subcontractors and suppliers. The benefit of trade qualified in house staff means that WRC can be self-sufficient on projects.

FACILITIES

Wild River has the following facilities-

Lot 1 LOUDOUN RD DALBY

This facility is the location of the WRC main office, precast yard and fabrication shed.

Land size of 6660m²

Shed of 500m² includes a gantry crane to assist in the manufacturing process of concrete cattle troughs and metal fabrication

The shed is equipped with -

- J 2 x 3.5T Gantry Cranes
- J Folding machines
- J Lathe
- J Punch and Shear machine
- J 3 Phase Mig Welders and more

8 COMMODITY COURT DALBY

This facility is currently the hardstand laydown yard for storage of containers and plant and equipment.

Land size of 10700m²

75 ARNHEM HIGHWAY, McMINN'S LAGOON

This facility is currently the hardstand laydown yard for storage of sea containers and plant and equipment.

Land size of 80 500m²

- Boilermaker

We have multiple staff that hold licences to operate all types of machinery including Excavators, Skidsteer Loader, Wheel Loader, MC Vehicles, HR Vehicles, EWP, Confined Space etc

INSURANCES

Work Cover

Policy No. - NAD141156805

Public Liability Insurance \$20M

MECON Policy No. - AP-34990 Exp. Mar2016

CAPABILITY & PAST PERFORMANCE

The Wild River Group was created in 2007 and has a proud track record of getting things done properly. Since the beginning Wild River Construction has built over 200 dwellings throughout the Northern Territory and refurbished over 650 throughout the Northern Territory in a 6-year period.

We have designed and completed a successful precast and ready-mix business in regional Queensland and continue to grow in capability & capacity.

CONSTRUCTION SERVICES

WRC has a team of tradesmen including Carpenters, Concreters, Plumbers, Electricians and Painters on staff.

Most recently Wild River Concrete and Construction has completed various projects:

YULEBA NORTH POWER STATION - Client: POWERLINK

- 3200M³ - 32MPA Structural Concrete for piers and transformer slabs, fencing

KURRAWONG FEEDLOT EXPANSION - Client: MORGAN PASTROL

- 3200 M³ - 32MPA Kerb Mix Supply & Install Slip form Feed Bunk & Apron

- 450M³ Causeways, Sheds & Silo Slabs

CONDUCTOR HOLES - Client: ARROW

- Worked as a subcontractor to drill and install cellar conductor in the field for Arrow Dalby.

OLINDA PARK FEEDLOT - Client: GIBSON PARTNERSHIP

- 200M³ Design and Install Concrete structure for Feed mill Upgrade

- 500 M³ - 32MPA Kerb Mix Supply & Install slip form Feed Bunk & Apron

MEANDARRA AIRPORT HANGAR - Client: MEANDARRA AERIAL

- Supply & Install Structural Steel & Concrete for Aircraft Hangar

WILD RIVER READY MIX PLANT - Wild River has sought appropriate approvals and constructed the newest twin 100T Silo plant in Commodity Court Dalby. This project is nearing completion.

QLD COTTON MUNGINDI - Prep & Pour 435m³ Bale unloading Slab.

WRC has maintained a strong client base throughout the agricultural & mining sectors completing various projects where it is not economical to travel concrete long distance to prep & pour large silo bases, Feedlot aprons and shed slabs. We maintain that our mobile batch plant and supporting plant & equipment is one of the most cost effective.

CONCRETE PRODUCTS

Wild River Precast Division has a home base in Dalby Qld. From this location WRC manufacture a large line of concrete cattle troughs, grid abutments, irrigation channel checks & bollards, piggery slats and retaining blocks and various gas field products. Our in-house boiler maker gives us the flexibility to be able to manufacture our own molds. With this know how we have the ability to manufacture a mold and take this to a remote job that would enable us to manufacture on site.

TRANSPORT & PLANT HIRE

WRC has freight capability in the form of Prime Movers & flat top trailers as well as side tippers and a float. Precast products are transported daily to our valued clients throughout Qld & the NT. We also have a range of plant & equipment in the form of Excavators, Wheel Loaders, Rollers and Water Trucks.

“We have the plant & equipment and most importantly the right people to travel almost anywhere in Australia to confidently complete large or small-scale Concrete & Construction projects safely, efficiently and on budget. Our ability to have the capacity & scope to perform these jobs is a true testament to the reliability and hard work of our valued staff members.”

Clayton Coleman – (WRC Managing Director)
